

CARLOS MANUEL GUARDADO DELGADO

Full Stack Developer | Web Systems

ANGULAR • NODE.JS • EXPRESS • MONGODB • REACT

La Libertad, El Salvador | +503 7544-8461 | cmgd292005@gmail.com | [GitHub](#) | [Linkedin](#) | [Portfolio](#)

Professional Profile

Software Developer with a solid technical foundation in the design, development, and deployment of scalable web applications. Demonstrated experience implementing Full-Stack architectures (Angular, React, Node.js, Express), managing relational and non-relational databases, and version control. Highly analytical profile focused on optimizing operational efficiency, ensuring backend robustness, and building high-performance, user-centric interfaces.

Academic Activities & Projects

Sismos SV Platform | Full-Stack Web Application (React, Node.js & Python)

- o Developed a full-stack web platform for seismic risk monitoring utilizing React, Node.js, and MongoDB.
- o Integrated an external Machine Learning service built in Python to process and analyze seismic data trends.
- o Configured cloud architecture and managed production deployments on Vercel and Render.

PC-SalesBot Pro | Telegram AI Assistant (Python, Google Gemini & MongoDB)

- o Developed an intelligent Telegram bot leveraging Python, the Google Gemini API, and MongoDB Atlas.
- o Implemented automated hardware recommendation workflows, catalog validation, and real-time chat history persistence.
- o Deployed and scaled the microservice application on Render with health checks and cloud environment configurations.

POS & Inventory System (Llantería) | Full-Stack Platform (Angular & Node.js)

- o Developed a corporate web platform for total inventory control and user management with full CRUD operations.
- o Implemented a modern frontend architecture with Angular and robust connectivity to a Node.js and Express backend.
- o Configured data persistence in MongoDB Atlas and successfully deployed to production environments using Vercel and Render.

MERN Inventory System | Full-Stack Platform (React & Node.js)

- o Designed and built a web application focused on library resource management.
- o Integrated a React.js frontend with a Node.js RESTful API, ensuring secure authentication and data synchronization.

Skills

- o **Frontend:** Angular, React.js, HTML5, CSS, JavaScript, TypeScript
- o **Backend:** Node.js, Express, Laravel, C#
- o **Databases:** MongoDB Atlas, MySQL, MariaDB, SQLite
- o **DevOps, Tools & Cloud:** Git, GitHub, Docker, Vercel, Render, VirtualBox.

EDUCATION

- o B.S. in Systems and Computing Engineering (4th year)
Universidad Dr. Andrés Bello (UNAB) | 2023 – Present
- o English Coursework - Academia Europea
